RE: Emergency Order of the Commissioner of the Tennessee Department of
Environment and Conservation of May 4, 2010, in the Matter of Middle
Tennessee Water Supply Emergency Due to Flooding, Case No. OGC10-0094

Dear Mr. Potter:

This letter is in response to your letter to Commissioner Fyke dated May 24, 2010. You reported that the water reserves of the Department of Water and Sewerage Services of the Metropolitan Government of Nashville and Davidson County now fluctuate between 80-90% of capacity. Based on this report, we are happy to inform you that the circumstances that existed at the time we issued the referenced Emergency Order have changed enough so that we can now modify the Order as it applies to your system as follows:

Effective immediately limited business uses will be permitted so long as water reserve levels remain above 75%.

If you have any further questions, please contact me at 532-0766 or Sherwin Smith at 532-0168

Sincerely,

Alan Schwendimann, Director
